To whom it may concern at Mahidol University:

As the English teacher of the CESI Arras engineering school, I am writing to you in support of **Maxence Hennart** and his desire to have his **12 weeks mandatory internship** in Thailand from June to September.

Maxence Hennart has been a student at the CESI for nearly two years now and has improved in English since his arrival. His English grades are increasing each semester. He is in his fourth year after graduating from high school.

His decision to apply for your internship was made in order to put in practice his English skills and learn about the Thai culture and work culture.

I have no doubt that he will do his best to adapt himself to the country, the work and the culture.

Do not hesitate to contact me if you need more information

Yours sincerely,

Amélie CHARLON
