Dear Admission Office of Mahidol University,

Re: Letter of Recommendation for Koh Chu Qian

I am an Assistant Professor in the School of Information Systems of Singapore Management University (SMU), a position I have held since 2012.

Ms. Koh Chu Qian is currently pursuing a B.Sc. degree in Information Systems. In the recent Term 1 of the Academic Year 2016-2017, she completed my course "IS103 Computational Thinking", which covered topics in data structures and algorithms.

It is my pleasure to recommend Ms. Koh for admission to the visiting program of Mahidol University International College.

Ms. Koh is in the Enhanced Learning in Information Technology (ELITE) Program, a talent development program for undergraduates in infocomm-related fields. She has an interest in using IT and analytics to better enhance the capabilities of organizations. In her internship with the Smart Nation Industry Department of Singapore's Info-communications Media Development Authority, she assisted in the Integrated Guest Experience project. As a Data Management Analyst, she helped Chuan-Fa Auto Pte Ltd to review and improve digital communication platforms, as well as to perform data analysis on clients' driving behavior.

Ms. Koh is also actively involved in social activities, such as Peer Helpers, an organization that helps students who may be having difficulties, as well as in Red Cross to interact with elderly.

I am confident that Ms. Koh will be a positive addition to the community of Mahidol University International College. Please contact me if you have any question about this recommendation

Yours Sincerely,

Hady W. Lauw

To Whom It May Concern

5 January 2017

Dear Sir / Madam,

Re: Ms KOH Chu Qian

I had the chance to teach Chu Qian on two of the core courses in the School of Information Systems (SIS). The two modules being Software Engineering, and Enterprise Integration in the year 2015 and 2016 respectively.

For the Software Engineering course, each student will be pre-assigned a team to build a web application throughout the duration of the term. Much collaboration is required as the team must developed a full-fledged application within limited time, and learn how to use new technologies such JSP/Servlets and deployment to the Cloud while juggling other modules. Being a good listener, and a meticulous individual, Chu Qian always provided strong support for her team. She also come across being earnest in learning, worked well in her team, and did very well for this project with her team.

Having another opportunity to work with her on the Enterprise Integration module, I have seen that she has started to be even more proactive in raising questions and clarifying doubts. The project scenario that her team works on is on accident claims. It was a well-rounded scenario with good prototype implementation, and a presentation that wowed the teaching team. This project earned the team a solid A, and her team made it to the JP Morgan competition, which is only by invitation for the top 5 teams. The competition gives the teams a chance to present their case, and pit against the other 4 teams to earn awards.

It is with great pleasure that I forward this letter of reference for Koh Chu Qian. Her well-rounded and earnest disposition will ensure that she will both contribute to your school, and gain much from the experiences being in your esteem school. I recommend Chu Qian without any hesitation.

Thank you.

Yours Sincerely,

Ong Hong Seng
