Dear Admission Office of Mahidol University,

Re: Letter of Recommendation for Ng Jia Jun

I am an Assistant Professor in the School of Information Systems of Singapore Management University (SMU), a position I have held since 2012.

Mr. Ng Jia Jun is currently an undergraduate enrolled in our B.Sc. (Information Systems) program. In the recent Term 1 of the Academic Year 2016-2017, he completed my course "IS103 Computational Thinking", which covered topics in data structures and algorithms.

It is my pleasure to recommend Mr. Ng to the visiting program of Mahidol University.

Mr. Ng is a student of good standing, and was a recipient of the Nanyang CCC University Scholarship in 2014. He shows active interest in technology and applying it in business settings. In his final year project, he led a team of four in developing a subscription management system, https://artisanbox.co. This application obtained 86 users with 68 subscriptions within 3 months. During his internship at eVantage Technology Pte Ltd, he helped set up IT infrastructure for five companies, in addition to project management and customer support responsibilities.

Mr. Ng also exhibits social conscience, through community service projects, including a role as an assistant finance director for a community improvement project in Yang Zhai Village, China, as well as volunteering to interact with elderly in the Orange Valley Nursing Home.

I am confident that Mr. Ng will do his utmost to avail himself to the academic opportunities at Mahidol University, as well as to contribute and engage socially with the community. If you have any question about this recommendation, please do not hesitate to contact me.

Yours Sincerely,

Hady W. Lauw
Assistant Professor

To whom it may concern,

It is my pleasure to recommend Ng Jia Jun for admission to the Visiting Program at Mahidol University International College. I came to know Jia Jun while I was his supervisor for his final year capstone project. The capstone course requires students to develop an IT system for a real-world business client that solves a real business problem. Jia Jun distinguished himself by delivering an interesting and well-researched project. His project acquired a total of 68 active subscribers within a short span of 3 months.

Jia Jun is diligent and has good analytical skills. As a project manager of the team, he planned tasks and schedules for his team members, which allowed sufficient time to complete the project before deadlines. He provided effective mitigation plans, which reduced project risks, allowing his team to make steady progresses. Throughout the course, Jia Jun demonstrated great perseverance and initiative. His work on his final project suggests that he would greatly benefit from the opportunities provided by a sustained period of graduate study. He has proven himself to have perseverance, initiative, and intellectual creativity. I therefore highly recommend Jia Jun for your academic program.

If I can be of any further assistance, or provide you with any further information, please do not hesitate to contact me.

Sincerely Yours,

Dr. Shannon Christopher Boesch
