December 10th, 2016

Dear Officer of Global Education,

This Letter of Recommendation is provided at the request of Ms. Wan Mei Ying, who is applying for the visiting program at the Mahidol University. It is my pleasure to recommend Mei Ying, one of the best students that I have ever had, and I sincerely hope this letter can facilitate your assessment of her.

I was Mei Ying's instructor for *ACCT 102: Management Accounting* in Term 1 of 2016/17. Throughout this course, Mei Ying demonstrated her strong capabilities of mathematical and logical thinking. Since management accounting mainly deals with the decision making at the management level, many problems are complex in nature; nevertheless, Mei Ying was able to learn the management accounting tools quickly and apply them to solve complex case problems, which has left a deep impression on me. As an example, Mei Ying and her groupmates conducted a comprehensive management accounting analysis of The Hershey Company, and they were able to make several valid recommendations for the Company based on their analysis. She not only contributed substantially to the project, but also effectively coordinated the efforts of her group members. What makes her even more remarkable is her nice personality and willingness to help others. Based on my observations in class, she often helped her fellow classmates clarify the concepts taught in class. As a result of her hard work, dedication, and intelligence, she earned an A+ and is ranked top three in this course.

When Mei Ying told me that she plans to apply for the visiting program at your prestigious university, I was very happy about and fully support her decision. She seems to have clear goals towards this exchange opportunity, one of which is learning more about the language and culture of Thailand. She is the kind of persons who can benefit from a nurturing and stimulating environment. For this and other reasons, I have no doubt that she will fully utilize this opportunity to improve herself and that she will represent Singapore Management University well. Therefore, I strongly recommend her for the visiting program, and your favorable consideration towards her application will be highly appreciated. Please do not hesitate to contact me if you have any questions.

Sincerely,

An-Ping Lin

To Whom It May Concern,

I am writing this reference letter at the request of Ms. Wan Mei Ying, who is applying for a visiting program in your university.

I was Mei Ying's instructor for course module IS103 Computational Thinking in Spring 2016. This course module is quite heavily loaded with quizzes, projects and final exam. Mei Ying was capable of working under pressure and was a good team player in the project. She demonstrated that she was able to grasp new concepts quickly and connect them to previous topics learnt. She had a wonderful rapport with her peers, and she often took the initiative to help her peers clarify concepts taught in class. Mei Ying shared that she did extra research to better understand how the concepts taught in class can be applied to the real world. Such enthusiasm is commendable and valuable in a student's learning process. Overall, her performance was excellent in this module and she was ranked among top 15% in the class.

Mei Ying is a brilliant and easy-going student with a positive attitude, and she had left an impression on me. Her effort in this course suggests that she is well-equipped to grow from challenges that she is presented with. With pleasure, I highly recommend a fast learner and a team player like Mei Ying to Mahidol University International College, and believe she will be a tremendous asset to your program. If you have any further questions, please do not hesitate to contact me.

Yours sincerely,
Jie Xiong
