Education

Pharma industry future stars 2016:
Training program by Pharma Industries. The program's goals were to familiarize with the field of pharma industry and make social connections.

University of Helsinki, Faculty of Pharmacy, Department of pharmacology
Bachelor of Pharmacy: Experimental bachelor degree where I was researching HEK-cells and their autophagy. The goal of the thesis was to explore how enzyme called prolyl oligo peptidase affects with cell's autophagy. Autophagy and prolyl oligo peptidase are part of the mechanism of Parkinson's disease.

Language skills

Finnish: native language
English: advanced written and spoken
Swedish: good written and spoken
Russian: beginner

Computer skills

Working knowledge of Microsoft office programs: Excel and Word. Basic skills of statistic programs called Eviews and R.

Volunteer work

Hartenberg review project, Czech, July 2011 – August 2011
Volunteering: building and restoring old castle.

Hobbies

My favourite hobby is climbing. Usually I do indoor climbing and bouldering. During the summer time, I also do rock climbing. Along with climbing I do bodyweight calisthenics. There I have set goals to be able to manage some challenging movements someday.
