Lippstadt, May 17th 2017

To whom it may concern:

It is my distinct pleasure recommending Ms. Fabiola Block for pursuing her exchange studies in Information and Communication Technology at Mahidol University Bangkok.

Ms. Block is one of my students in the 4th semester class of User Experience Design during the summer semester 2017 of Visual Computing and Design. In addition, I supervised her Web and Corporate Design development in the 3th and Design foundation and graphical implementation in the 1st semester. All the project thesis focused on the performance and design of interface and interaction solutions.

I got to observe throughout the semesters that Ms. Block has been carrying out each and every task with utmost professionalism and outstanding integrity. She presented herself consistently with a "can-do" attitude combined with an excellent level of dedication to the tasks at hand. Instead of getting stuck and quit, Ms. Block used her creativity continuously to develop alternatives for technological solutions and design knowledge. Her excellent in-depth technical knowledge paired with her amazing ability to quickly grasp and understand new ideas are two of the main pillars of her successful work. At the same time, Ms. Block was perceived by her fellow students as an excellent team player and real asset for the group projects.

Her excellent quality skills for design and user experience are remarkable and deserve special mentioning.

Ms. Block's behavior towards the faculty and fellow students was impeccable at all times.

Based on this, I am convinced that Ms. Fabiola Block will be extremely successful studying at Mahidol University Bangkok.

I wish Ms. Block all the best for her exchange study while looking forward to be able to collaborate with her again. Please don't hesitate to contact me anytime in case of further questions.

Yours sincerely,

Rainer Baum
