Reference Letter for Mrs. Ana Luiza Arruda (StudentID 03658779)

Dear ladies and gentlemen,

Mrs. Ana Luiza Arruda is a student in the Master programm "Mathematics in Science and Engineering" at the Technische Universität München.
In her first semester in this Master program she successfully attended the lectures Partial Differential Equations (grade C-/3.7), Computer Aided Medical procedures (grade A+/1,0) and Parallel Numerics (grade C+/3,0). That is quite o.k. for a student that just has done the large step from a Bachelor in Engineering to a Master program in Mathematics.

Mrs. A. Arruda has an interesting and international academic background. Born in Sao Paulo (Brazil), she visited the German school in Rio de Janeiro (A-level examination with grade A+/1.1). After one semester in the field of Bioprocess Engineering at the Universidade Federal do Rio de Janeiro (2014) she came to Germany and successfully studied Engineering Science at the Munich School of Engineering (2014-2017, grade average B-/2.4) in a very short time. Her stay was supported by a Scholarship of the DAAD.

She speaks several languages (Portugese, German and English excellent, in addition Spanish, French and Mandarin).

Moreover, Mrs. A. Arruda showed quite a lot of engagement in social work and achieved several awards in school.

A stay at the Department of Mathematics of the Mahidol University for one semester would fit rather well into her Master program. In Thailand she would focus on lectures for her minor as e.g. Bioinformatics, Bioimage Informatics and Advanced Biomedical Image Processing besides the mathematical lectures. The selection of all the lectures at the foreign university will be coordinated with me to guarantee maximum benefit for the Master program of the candidate at home. Besides the academic aspect, Mrs. A. Arruda is greatly interested in the culture of Thailand, surely an additional motivation for her studies abroad.

Technische Universität München

Zentrum Mathematik M2

I fully support her application for the exchange semester at the Mahidol University.

Best regards,

R. Callies
Graduate Advisor
